Weixuan Yuan

Zürich, Switzerland · weixuan.yuan@inf.ethz.ch · yzll0.github.io

Research internship interests: LLM reasoning, post-training, and AI for mathematics and TCS.

Education & Research Positions

ETH Zürich — Ph.D. in Computer Science May 2025–Present
Advisor: Prof. Rasmus Kyng.

ETH Zürich — Research Assistant October 2024–April 2025
Rasmus Kyng's group.

ETH Zürich — M.Sc. in Data Science September 2022–October 2024
Willi Studer Prize (best graduate in the MSc Data Science program, 2025).

Xi'an Jiaotong University — B.Sc. in Mathematics September 2018–July 2022

Selected Research

AuXSpec: executable specifications and LLM reasoning

- Proposed the executable-postcondition approach and co-designed the Lean specification format, connecting declarative and executable specifications through equivalence theorems.
- Co-developed a multistage LLM-based agentic pipeline for formalization, verification, and repair, producing 3,037 problems with proven equivalence and 19.5K SFT samples.
- Contributed to discussions of post-training methods, reward design, and experimental results. Team SFT/RL results reached SpecGen pass@4 of 60.3% on AuXSpec-Test and 84.7% on Verina (out of distribution).

Graph algorithms — FOCS 2025

Co-authored the first deterministic almost-linear-time Gomory-Hu tree algorithm, running in $m^{1+o(1)}$ time. Presented the paper at the IEEE Symposium on Foundations of Computer Science (FOCS 2025). [slides]

Selected Publications

Deterministic Almost-Linear-Time Gomory-Hu Trees
Amir Abboud, Rasmus Kyng, Jason Li, Debmalya Panigrahi, Maximilian Probst Gutenberg, Thatchaphol Saranurak, **Weixuan Yuan**, Wuwei Yuan.
FOCS 2025. [paper]

Optimal subsampling for principal component analysis
Xuehu Zhu[†], **Weixuan Yuan**[†], Zongben Xu, Wenlin Dai.
Science China Mathematics 68, 2993-3016, 2025. [paper]

Optimal subsampling for estimation of dimension reduction directions
Xinru Jia[†], **Weixuan Yuan**[†], Xingqiu Zhao, Xuehu Zhu.
Scandinavian Journal of Statistics 53(1), 575-611, 2026. [paper]

[†] Equal contribution. Author order in theoretical computer science papers is alphabetical. The statistics research was conducted during my undergraduate studies (before 2023).

Under-Review Manuscript

AuXSpec: Learning to Autoformalize Program Specifications via Executable Postconditions
Co-first author; under review at ICLR 2027. Not yet publicly available.

Technical Skills

Programming: Python, Lean 4.
Theory: Algorithms; probability and statistics; optimization, including gradient-based methods.
